Digital Curation Centre and e-Infrastructures Austria:
Data Management Plan (DMP) Workshop

Thursday 17th November, Vienna, 9:30-16:15
Location: OeAD (Österreichische Austauschdienst,
1010 Vienna, Ebendorferstrasse 7

The workshop is sponsored by the e-Infrastructures Austria project and is targeted at researchers, research offices, funders, librarians, IT support and all those involved in the management of open data. The aim of the course is to explain the value of open data and some of the drivers for this, such as the Horizon 2020 Open Research Data pilot. The course will point to good practice and tools that can be used to support data management, and the session on national services will outline models from elsewhere that could be considered in the Austrian context. The workshop will be led by the UK Digital Curation Centre.

Agenda (Status 14th September 2016):

Time	Session	Speaker
09:30	Welcome and introductions	Paolo Budroni
09:45	Horizon 2020 and the Open Research Data pilot - What is required of participants? - How to comply and be open? - FAIR Data Management in H2020 - What support is available (incl. outlook on 2017)	Sarah Jones
10:30	Coffee	
11:00	Data Management Plans - The value of plans and planning - How to develop DMPs - EC DMP template on - Demo of DMPonline (incl. outlook on 2017)	Sarah Jones
11:45	Practical exercise: supporting DMPs - What help is needed? - Who should do what? - What role should national services play? - Breakout groups working with use cases	All
13:00	Lunch	
14:15	National and shared services: lessons from elsewhere - The DCC model and other comparators - The range of services to provide - Lessons from the DCC experience and RDA National Data Services interest group	Kevin Ashley

15:00	Panel Discussion on national and shared services - What would be useful in an Austrian context/German speaking countries? - What to deliver locally and what nationally? - Where next for the Austrian landscape?	Panel: 4-5 Participants/ 1 Chair
16:00	Wrap up	e-Infrastructures Austria/DCC
16:15	Close	

Number of participants: 70-80

For registration please contact barbara.sanchez.solis@univie.ac.at

Speakers' bios DCC

Sarah Jones, *Senior Institutional Support Officer DCC*
Sarah's current work focuses on the DCC's institutional engagement programme. She is leading DCC support for several universities, helping them to scope researchers' requirements, deliver training, customise DMPonline and implement research data management services. She also develops resources on research data policy and data management planning and is involved in supporting JISC Managing Research Data projects. In previous roles, Sarah led the JISC-funded DAF project and Incremental. She has been working in HATII at the University of Glasgow since 2006, initially for the AHDS Performing Arts data centre and then for the DCC. For more info see:

Kevin Ashley, *Director DCC*
At the DCC, Kevin directs activities whose primary goal is the development of research data services in UK universities. He began his career in computing support for medical research before moving to ULCC, one of the UK national supercomputing services. He worked in development and management roles and contributed to a number of international standardisation initiatives in networking. From the early 1990s his team concentrated on the development of digital archive services for a range of public bodies including the British Library and the Public Record Office with a special focus on database archives. For more info see:
