How can EARMA help you to build your competence and improve your career as a research manager and administrator?

Jan Andersen
Senior Executive Officer, Team Coordinator
Research Support DTU
Technical University of Denmark
Trends in research – Why we need a professional research Administration

**Funding complexity**
- From national to international funding
- From small individual funds to large corporates
- Competitive funding
- Research for research’s sake to research for society
- Research Output: Open data and Big data

**Control to Service**
- The researcher in focus, not the admin system
- Targeted support and information
- Direct communication
- Proactive approach

**Global recruitment and competition**
- New players in the academic field
- Mobility of researchers
- Ranking and benchmarking

**Organisation**
- Critical mass in support functions
- Policy: Role and power management level
- Legalisation and rules: institutional commitment
- Restructuring – “Synergy & Critical Mass”
